

GCSE Geography Paper 2 Revision Checklist

Section A Urban Issues and Challenges

Key Idea	Specification Content	How confident are you?		
				
A growing % of the world's urban population lives in urban areas.	The global pattern of urban change.			
	Urban trends in different parts of the world including HICs and LICs.			
	Factors affecting the rate of urbanisation - migration (push-pull theory), natural increase.			
	The emergence of megacities.			

A case study of a major city to Mumbai, NEE to illustrate;

Key Idea	Specification Content	How confident are you?		
				
Overview of Mumbai	the location and importance of the city, regionally, nationally and internationally			
	causes of growth: natural increase and migration			
How urban growth has created opportunities	social: access to services - health and education; access to resources - water supply, energy			
	economic: how urban industrial areas can be a stimulus for economic development			
How urban growth has created challenges	managing urban growth - slums, squatter settlements			
	providing clean water, sanitation systems and energy			
	providing access to services - health and education			
	reducing unemployment and crime			

	managing environmental issues - waste disposal, air and water pollution, traffic congestion.			
Example	How urban planning is improving the quality of life for the urban poor in Mumbai			
Key Idea	Specification Content	How confident are you?		
				
Urban change	An overview of the distribution of population and the major cities in the UK.			

A case study of a major UK city to London to illustrate:

Key Idea	Specification Content	How confident are you?		
				
Overview of London	the location and importance of the city in the UK and the wider world			
	Impacts of national and international migration on the growth and character of the city			
How urban change has created opportunities	social and economic: cultural mix, recreation and entertainment, employment, integrated transport systems			
	environmental: urban greening			
How urban change has created challenges	social and economic: urban deprivation, inequalities in housing, education, health and employment			
	environmental: dereliction, building on brownfield and greenfield sites, waste disposal			
	the impact of urban sprawl on the rural-urban fringe, and the growth of commuter settlements.			
An example of an urban regeneration project (London 2012)	reasons why the area needed regeneration			
	the main features of the project.			
Features of sustainable urban living. Requires management of	water and energy conservation			
	waste recycling			

resources and transport.	creating green space.			
	how urban transport strategies are used to reduce traffic congestion.			

Paper 2 Section B The changing economic world

Key Idea	Specification Content	How confident are you?		
				
There are global variations in economic development and quality of life.	Different ways of classifying parts of the world according to their level of economic development and quality of life.			
	Different economic and social measures of development: gross national income (GNI) per head, birth and death rates, infant mortality, life expectancy, people per doctor, literacy rates, access to safe water, Human Development Index (HDI).			
	Limitations of economic and social measures			
	Link between stages of the Demographic Transition Model and the level of development.			
	Causes of uneven development: physical, economic and historical.			
	Consequences of uneven development: disparities in wealth and health, international migration.			

Key Idea	Specification Content	How confident are you?		
				
Various strategies exist for reducing the global development gap.	An overview of the strategies used to reduce the development gap: investment, industrial development and tourism, aid, using intermediate technology, fairtrade, debt relief, microfinance loans.			
	An example of how the growth of tourism in an LIC or NEE helps to reduce the development gap.			

Key Idea	Specification Content	How confident are you?		
				
Some LICs and NEEs are experiencing rapid economic development which leads to significant social, environmental and cultural change. CASE STUDY: NIGERIA	A case study of one LIC or NEE to illustrate:			
	•• the location and importance of the country, regionally and globally			
	•• the wider political, social, cultural and environmental context within which the country is placed			
	•• the changing industrial structure. The balance between different sectors of the economy. How manufacturing industry can stimulate economic development			
	•• the role of transnational corporations (TNCs) in relation to industrial development. Advantages and disadvantages of TNC(s) to the host country			
	•• the changing political and trading relationships with the wider world			
	•• international aid: types of aid, impacts of aid on the receiving country			
	•• the environmental impacts of economic development			
	•• the effects of economic development on quality of life for the population.			

Key Idea	Specification Content	How confident are you?		
				
Major changes in the economy of the UK have affected, and will continue to affect, employment patterns and regional growth.	Economic futures in the UK:			
	•• causes of economic change: de-industrialisation and decline of traditional industrial base, globalisation and government policies			
	•• moving towards a post-industrial economy: development of information technology, service industries, finance, research, science and business parks			
	•• impacts of industry on the physical environment. An example of how modern industrial development can be more environmentally sustainable			

	•• social and economic changes in the rural landscape in one area of population growth and one area of population decline			
	•• improvements and new developments in road and rail infrastructure, port and airport capacity			
	•• the north-south divide. Strategies used in an attempt to resolve regional differences			
	•• the place of the UK in the wider world. Links through trade, culture, transport, and electronic communication. Economic and political links: the European Union (EU) and Commonwealth.			

Paper 2 Section C The challenge of resource management

Resource Management

Key Idea	Specification Content	How confident are you?		
				
Food, water and energy are fundamental to human development.	The significance of food, water and energy to economic and social well-being.			
	An overview of global inequalities in the supply and consumption of resources.			

Key Idea	Specification Content	How confident are you?		
				
The changing demand and provision of resources in the UK create opportunities and challenges..	<p>An overview of resources in relation to the UK.</p> <p>Food:</p> <ul style="list-style-type: none"> •• the growing demand for high-value food exports from low income countries and all-year demand for seasonal food and organic produce •• larger carbon footprints due to the increasing number of 'food miles' travelled, and moves towards local sourcing of food •• the trend towards agribusiness. 			

	Water: <ul style="list-style-type: none"> •• the changing demand for water •• water quality and pollution management •• matching supply and demand - areas of deficit and surplus •• the need for transfer to maintain supplies. 			
	Energy: <ul style="list-style-type: none"> •• the changing energy mix - reliance on fossil fuels, growing significance of renewables •• reduced domestic supplies of coal, gas and oil •• economic and environmental issues associated with exploitation of energy sources 			

Section C - Optional Topic Energy

Key Idea	Specification Content	How confident are you?		
				
Demand for energy resources is rising globally but supply can be insecure, which may lead to conflict.	Areas of surplus (security) and deficit (insecurity): <ul style="list-style-type: none"> •• global distribution of energy consumption and supply •• reasons for increasing energy consumption: economic development, rising population, technology •• factors affecting energy supply: physical factors, cost of exploitation and production, technology and political factors. 			
	Impacts of energy insecurity - exploration of difficult and environmentally sensitive areas, economic and environmental costs, food production, industrial output, potential for conflict where demand exceeds supply.			

Key Idea	Specification Content	How confident are you?		
				
Different strategies can be used to increase energy supply.	Overview of strategies to increase energy supply: <ul style="list-style-type: none"> •• renewable (biomass, wind, hydro, tidal, geothermal, wave and solar) and non-renewable (fossil fuels and nuclear power) sources of energy 			
	an example to show how the extraction of a fossil fuel has both advantages and disadvantages.			
	Moving towards a sustainable resource future: <ul style="list-style-type: none"> •• individual energy use and carbon footprints. Energy conservation: 			

	designing homes, workplaces and transport for sustainability, demand reduction, use of technology to increase efficiency in the use of fossil fuels			
	an example of a local renewable energy scheme in an LIC or NEE to provide sustainable supplies of energy
